Legend:
- ● Yes
- ● No
- ● Sometimes

95.2%

Are the emotions correctly detected?

Legend:
- ● Yes
- ● No

100%

Do the system plays music accordingly after detecting the emotions?

Are you satisfied with the system?

- Yes
- No

100%

●<u>Key Suggestions:</u>

1. If the System could detect Emotions also from tone of Voice.
2. If the Music could be downloaded as per Emotions as well.
3. Adding a Suggestions option to make it easier for the user to give Suggestions and improve future versions.

●<u>Conclusion</u>:

Based on the collected feedback, it is evident that the app is well-received while still offering scope for refinement. The systematic analysis of user responses has helped identify both strengths and areas requiring improvement. This task report demonstrates the importance of user-centric development and will guide our future updates to create a more efficient and user-friendly application.
